PROFESSIONAL SUMMARY

Software Engineering undergraduate at the University of Kelaniya seeking a Full Stack Developer Internship. Hands-on experience building and deploying full-stack web applications using React.js, Spring Boot, Node.js/Express, MySQL, and MongoDB, with practical experience in REST API design, JWT/OAuth 2.0 authentication, real-time communication (WebSockets, SSE), and Cloudinary-based image/media handling. Strong foundation in OOP, DSA, and SOLID principles, with proven ability to take applications from design through deployment in individual and team settings.

EDUCATION

B.Sc. (Hons) in Software Engineering | Apr 2024– Present

University of Kelaniya, Sri Lanka | Current GPA: 3.40/4.00

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, C, PHP.

Frontend Development: React.js, Vite, HTML5, CSS3, Tailwind CSS, Responsive Web Design.

Backend Development: Spring Boot, Spring Security, Node.js, Express.js, FastAPI.

API & Real-Time Communication: REST APIs, RESTful Web Services, WebSockets, Server-Sent Events (SSE).

Database Technologies: MySQL, MongoDB.

Authentication & Security: JWT, OAuth 2.0, Google OAuth, Authentication & Authorization, bcrypt.

Tools & Platforms: Git, GitHub, Postman, Cloudinary, Vercel, Railway.

Core Skills: OOP, DSA, SOLID Principles, Problem Solving, Team Collaboration, Communication, Adaptability.

PROJECTS

RealEstate Pro (Individual Project)

Built a full-stack real estate platform using React.js and Spring Boot, with responsive interfaces for Buyers, Sellers, and Administrators. Designed REST APIs, backend business logic, and MySQL data models using Spring Data JPA. Implemented secure JWT authentication with Spring Security, real-time chat using Spring WebSocket, advanced property search and filtering, Cloudinary-based image management, and automated SMTP email notifications.

Tech Stack: React.js (Vite), Tailwind CSS, Spring Boot, JWT, MySQL, Cloudinary API.

[Source Code](#)

Student Project Showcase Portal (Group Project)

Developed a full-stack MERN application enabling students to publish, browse, and approve academic project submissions through role-based dashboards. Designed REST APIs and MongoDB data models supporting JWT and Google OAuth authentication, category- and tag- based search, and project approval workflows. Implemented real-time activity updates using Server-Sent Events (SSE), improving live visibility of platform activity without page refreshes.

Tech Stack: MERN Stack, JWT, Google OAuth, Server-Sent Events (SSE).

[Source Code](#)

Expense Tracker (Individual Project)

Built a responsive full-stack expense management app (MERN stack) with protected backend routes secured via JWT authentication and bcrypt password hashing. Designed interactive dashboards and charts using Chart.js to visualize daily, weekly, monthly, and yearly transaction trends. Implemented REST APIs and Excel export functionality, allowing users to download their transaction history for offline analysis.

Tech Stack: MERN Stack, JWT, Tailwind CSS, Chart.js, xlsx, RESTful API integration.

[Source Code](#)

Book Fair Stall Reservation System (Group Project)

Developed a full-stack reservation platform (React, Spring Boot, MySQL) covering stall booking, authentication, and advance payment processing. Implemented real-time booking updates using STOMP/SockJS WebSockets, automated notifications via Spring Scheduler, and QR-code-based check-in. Built a machine learning recommendation service using Python, FastAPI, and a Random Forest model to suggest optimal stall selections.

Tech Stack: React (Vite), Tailwind CSS, Spring Boot, Spring Security, Python, JWT, MySQL.
